Program Overview

At the School of Landscape Architecture (LAN) you’ll learn to create relevant, innovative, and artistic solutions for all kinds of different outdoor places. From urban plazas and parklets, to tidal marshes and bike trails—we teach the skills needed to resolve contemporary design challenges, both large and small.

OUR MISSION

The Mission of School of Landscape Architecture is to educate a new generation of landscape architects by offering a first professional degree program carefully crafted to embrace the complex ecological, aesthetic, and multicultural nature of contemporary practice. Our academic and practice-based curriculum provides students with meaningful and tangible skills necessary to address the challenges facing today’s landscape architects.

Guided by nationally recognized landscape architects and designers, you will embark upon a rigorous design education that combines academic, hands-on, interdisciplinary, and community-based projects. This provides you with many opportunities to explore and develop your own effective and marketable design process.

Local landscape architecture firms report that our students “develop their own unique design language and individual graphic styles to express it.” This unique approach sets our students apart during portfolio reviews and during job interviews.

WHAT SETS US APART

- We work directly with local neighborhoods, communities, and non-profit organizations to reach relevant and responsible design solutions
- We have an active student chapter of the American Society of Landscape Architects
- Our instructors are highly experienced practicing landscape architects, landscape designers, architects, and artists
- We currently offer many of our classes online and our program is in the process of becoming one of the first degree-granting online programs in landscape architecture in the United States
- We are located in the Historic Del Monte Cannery within walking distance of several world-class public spaces designed by renowned landscape architects
- We offer numerous opportunities to collaborate with the 21 other schools at Academy of Art University, creating a new approach to the design of outdoor spaces

academyart.edu
What We Teach

Landscape architecture is an interdisciplinary and collaborative profession. It is a vital combination of art and science, urban and rural, living systems and sculptural form, historical precedent and innovative vision, and theory and construction. It is the profession of the future.

PEOPLE & THE ENVIRONMENT
Designing outdoor space is all about people. You learn methods of observing, recording, analyzing and engaging with people’s rich, complex relationships with their outdoor environment.

ADVANCED DIGITAL GRAPHICS
As a landscape architect, effectively communicating your vision to your client is essential to your professional success as a landscape architect. We teach you how to apply advanced rendering software and interactive modeling to clearly illustrate your design intent.
SUSTAINABLE DESIGNS & PRACTICE STUDIO
Landscape architecture is, at its very core, a pursuit of sustainability and resilience. These courses emphasize resolving contemporary design challenges with real-world projects and clients. You explore innovative details, strategies, and systems of landscape construction throughout the design process.

THE TECHNICAL WORLD: GRADING & DRAINAGE
Sculpting the earth and controlling the movement of water across it are crucial skills that differentiate landscape architecture from other design professions. We teach you strategies and calculations to create accurate grading and drainage plans that incorporate functionality and artistry.

ECOLOGICAL FOUNDATIONS OF DESIGN
You learn to interpret and analyze the landscape, refining your knowledge of the interconnected natural systems involved in designing a landscape. Such systems include climate and water systems, plant life and wildlife habitats, soils and types of terrain, and geologic processes. Your observations will form the basis for design decisions in the studio.

ADDITIONAL TOPICS
History, Theory, and Criticism, Construction Documentation and Communication, Plants, Ecosystems, Sustainability and Resilancy, Cultural and Social Systems and Community Engagement.
Faculty

We believe that practicing instructors bring energy, clarity, and invaluable contemporary experience into the classroom environment, project critiques, and student growth.

Jeff McLane, ASLA, PLA
Director

Jeff McLane is a licensed landscape architect in California and the founding partner and president at Jeff McLane + Associates. He was also a founding partner of MAC Studio, a community-based design group in Oakland. Jeff is LEED BD+C certified through the US Green Building Council and is committed to design work that is sustainable, responsible, and inclusive.

Since 1993, Jeff has worked on a variety of public and private projects including commercial, educational, institutional, and community participatory design throughout the greater San Francisco Bay Area. Jeff is also a fine arts painter and sculptor, and his pieces have been exhibited in galleries throughout the Bay Area.
Heather Clendenin, ASLA, PLA

Online Director

Heather Clendenin is a licensed landscape architect in California. Her list of projects includes the Advanced Concepts Center for General Motors in Malibu, Columbia University’s athletic training center in NYC, Carousel Park Playground at the Santa Monica Pier, the master plan for Harvey Mudd College, and General Motors’ corporate headquarters in southern California. She holds a BA in environmental design from UC Berkeley and an MLA from the Graduate School of Design at Harvard University.

Our instructors have worked, or are currently working, at the following companies:

SWA
Hargreaves Associates
PWP
Bionic
Surface Design
Tom Leader Studio
PGA Design
Antonia Bava Landscape Architects
Terrain Studio
TS Studio
Quadrica
AECOM
Groundworks
Terra Firma
Sasaki Associates
Michael Van Valkenburgh Associates
Carol Johnson Associates
Theiriot Landscape
Stevens and Associates
Degree Options

GRADUATE PROGRAMS
The MFA is a professional degree program culminating in a thesis project: A self-selected project developed over a few semesters under the guidance of landscape architecture professionals with specific expertise related to the thesis content.

The coursework emphasizes the factors involved in the creation of many types of outdoor spaces, including the skills required to communicate complex design solutions, advanced hand and digital graphics, the observation of human nature, the integration of natural systems, and the importance of research and analysis in the design process.

MASTER OF FINE ARTS (MFA) - TRACK 1, 63 UNITS
Track I is available to students who have already obtained an undergraduate professional degree, such as a BLA or B.Arch. This advanced coursework emphasizes theories of open urban spaces; collaborative and interdisciplinary methods of design; and implementation, sustainability, advanced digital rendering techniques, and analysis, planning and design at a variety of scales.

MASTER OF FINE ARTS (MFA) - TRACK 2, 87 UNITS
Track II is available to students with a BA or BS degree who have limited or no experience with art and design. The first two semesters focus on establishing the fundamentals of hand and digital drafting, site engineering, planting design, ecological systems, and an introduction to site analysis and site design. Advanced coursework then leads to the thesis.

MASTER OF ARTS (MA)
The Master of Arts program offers an introduction to landscape architecture. Coursework emphasizes the essential factors involved in the creation of outdoor spaces. This program is appropriate for students who want to learn more about the profession but are not interested in practicing as a landscape architect in the future.
Our Facilities

Learn in studios equipped with industry-based equipment and technologies that will help you actualize your ideas in both traditional and new media.

STUDIO SPACE
Our studio and classroom spaces provide a professional and inspiring atmosphere to work in. Gain access to drafting tables and storage space when you enroll in a studio.

PRINT ROOM
Our onsite print room is equipped with both a large and small format color printer and scanner.

OUR LOCATION
The Cannery is a historic building located along the northern waterfront of San Francisco, near Fisherman’s Wharf. Within walking distance of our third-floor facility are dozens of world-class public open spaces designed by renowned landscape architects and urban designers. With the fabric of the beautiful and complex City by the Bay as your laboratory, you will be able to observe firsthand just what makes an outdoor public place successful and welcoming.

COMPUTER LAB
Our lab has 21 Dell computers loaded with all of digital and animation software you will need to effectively communicate your design ideas. We offer one-on-one tutorials and workshops on a regular basis to assist students with their coursework.
Student and Alumni Testimonials

Our 50,000-plus Academy alumni are some of the most successful and sought-after professionals in art, entertainment, and design today. But we’re just getting started. Our current pool of creative and innovative students are preparing to redefine the future.
“While I’ve learned a lot and had a lot of great experiences with field trips, class projects, and collaborative designs, the most valuable to me was the grading and drainage class. Just being a person in the world, you should understand how your city works.”

Daniel Correia
MFA ’15, Draftsperson II, Verde Design

“LAN is a great department at Academy of Art, and both the curriculum and faculty are good for the students to better understand landscape architecture and become professional in this area. Everyone in LAN is super nice! LAN is the space where you feel comfortable.”

Diana Liao
Landscape Architecture student

“This field, to me, is both functional and aesthetic design. We need to have knowledge of plants, weather, human and social factors, water, etc. We combine all those things in our learning process to develop our exterior living space.”

Xiaohui “Kaye” Yan
Landscape Architecture student

“I feel it is never too late to work hard for my future, for others, and for society. I had a chance to go to work before I came to Academy of Art University. But I think all the people I met and all the time I spent here helped me to be a better person with positive thinking.”

Yuening Pu
MFA ’16, Landscape Designer, Terrain Studio
Student Awards

Students from the School of Landscape Architecture have won a number of prominent awards in the last few years. From the San Francisco Flower & Garden Show, to consecutive ASLA Award of Excellence awards, LAN students are making a positive impact on the industry.
ERIC ARNESON
Eric Arneson, BFA ’16, received the 2016 ASLA Student Honor Award for General Design for his Bendway Park proposal. This project replaced an existing gravel mining operation on the banks of the Russian River in the small town of Healdsburg, California with a restored riverfront dedicated to multiple uses.

Eric’s project was one of 271 other projects submitted by landscape architecture students across the country and around the world. His thoughtful approach, clear depiction of his design process, and beautifully executed illustrations featuring a blend of hand-drawn and digital graphics won a great deal of praise from the judges. Eric hopes that one day this project will actually become a reality.

NAHAL SOHBATI
The following year, Nahal Sohbati, MFA ’17, won the 2017 ASLA Award of Excellence in Student Community Service for her Ridge Lane Project, which was also her MFA thesis project. While the project originated in the classroom, it has the added distinction of actually being installed. Nahal’s entry was one of 295 entries from 52 different landscape architecture programs around the world.

Working closely with the local community, Nahal proposed changes to a long abused and forgotten strip of abandoned land in the heart of the neighborhood. It now serves as a center for community gatherings and provides a safe, beautiful pathway connecting the various streets of the neighborhood. This project has also won recognition from the California State Senate, the California State Assembly, the City and County of San Francisco and the San Francisco Parks Alliance.
Living and studying in the San Francisco Bay Area provides our students with an enviable canvas onto which they can project the best, most creative elements of their imagination, as well as abundant Landscape Architecture resources. Moreover, the Academy of Art University’s School of Landscape Architecture offers students various real-world experience to practice their skills and showcase their work by establishing partnerships with local companies in different fields.

**EPIC CLEANTEC PROJECT**

The San Francisco based biotech company, Epic Cleantec collaborated with the School of Landscape Architecture on its latest project of designing a demonstration garden as a part of the renovation for the historic Honda Building at 10 South Van Ness, an event space run by Non Plus Ultra.

Epic Cleantec, which creates high quality renewable soil from the waste in water, wanted the garden to be a place to host events and demonstrate product success. CEO and Co-founder of Epic CleanTec Aaron Tartakovski reached out to School of Landscape Architecture to handle the redesign.

“A landscape architect had suggested that we reach out to the landscape department. We reached out to Jeff [McLane], and there was an interest to work together. [Non Plus Ultra] originally were planning on doing their own thing out there. We said we’d take it over and turn it into something beautiful and have a nice story about this very green sustainable project,” Tartakovski said.

LAN Director Jeff McLane received the query and pitched the idea to Chenglu “Lacey” Luo, an M.F.A. student, who in turn involved a few of her classmates. Luo and three other students had to come up with their designs in just three weeks to pitch to the Epic CleanTec team.

“Each student presented their idea, and we met once a week for three weeks, and we did desk crits. They all came up with their ideas and they each presented a separate proposal today. It needed to be flexible if 75 people showed up it would still work,” said McLane.

The communications were astoundingly positive. “To be honest, we gave them very little instruction and full artistic freedom. The basic parameters were that it was a showcase garden to show the growing power of the product. You don’t have to buy off the shelf fertilizer to do this stuff. You can do this in a more renewable sustainable way,” Aaron Tartakovsky said. “I’m completely blown away with this stuff. It’s brilliant. The visions they came up with—it’s so beyond what I had been thinking.”
Career Paths

As one of the top art and design schools in the country, Academy of Art University landscape architecture graduates have a range of opportunities to choose from. Our facilities, faculty, and hands-on learning approach are designed to provide you with the tools you need to succeed as a landscape architect.

WHO IS HIRING OUR ALUMNI

- SWA
- CMG
- Terra Firma
- Arterre Landscapes
- PGA Design
- Harris Landscape Architecture
- Smith and Smith
- Lucas and Lucas
- Turenscape, Beijing
- TS Studio
- Vita Landscape Architects
- Verde Design
- Code 4 Media Group
- WWA Shanghai

LANDSCAPE ARCHITECT

Analyzes, plans, designs and implements natural as well as built environments of all scales. Designs and plans the restoration of disturbed natural places and systems such as stream corridors, wetlands, forested areas and mines, as well as urban, public and private landscape spaces.

LANDSCAPE DESIGNER

Working under the direction of the landscape architect, you help with the various stages of the project design process and help produce the renderings needed to communicate, producing the renderings needed to communicate the project to the clients and the construction drawings needed to build the project.

URBAN DESIGNER

Responsible for the design or redesign of existing urban spaces. Crafts unique and usable spaces for the public. Revitalizes existing amenities or creates new physical connections.
MASTER PLANNER
Abstracts ideas into spatial forms. Envisions and designs large-scale communities and leads the design process from conception to final construction.

RESIDENTIAL DESIGNER
Responsible for planting, irrigation and some hardscape design for residences and estates. Works with other designers and staff to create holistic visions of urban spaces.

PLANTING DESIGNER
You create planting designs based on site analysis, concept, and horticultural possibilities. You use plants in a creative and sustainable way to design projects at various scales.

LANDSCAPE RENDERER
Oversee the creation of drawings, plans, elevations, perspectives and axonometrics to communicate design intent and the spatial experience.
The Online Degree Program

The Online Degree Program

Take any online course at the Academy, and experience the visual, interactive, and dynamic courses we’re known for. You will have the same quality instructors, the same hands-on learning opportunities, and the same attentive support as our onsite students. The difference? The flexibility to earn your art and design degree on your terms.

In the early days of online learning, many thought that the “site specific” nature of landscape architecture (LAN), combined with the important studio experience, made it too challenging to teach online.

But times have changed. Each online course we offer has been designed with LAN’s unique challenges in mind. Take any online landscape architecture course at the Academy, and you’ll experience the same industry driven, rigorous, education offered on campus. You’ll have the same expert instructors, the same hands-on learning, and the same attentive support.

Here are just a few things that make our online program stand out:

• Course content is proprietary, created in-house by LAN experts, and exclusive to the Academy
• The classes are a mix of lecture content, video, written content, recorded audio, interactive slide-shows, and hands-on work
• The flexibility to earn your LAN degree on your own time, and your own terms is unparalleled
• Our Learning Management System (LMS) allows you to freely exchange thoughts, post work, and provide or receive constructive feedback—just like you would in a campus environment
• You and your peers support and push each other, creating long-lasting connections that live beyond the course. You may not be on campus, but you’re not alone
The images on this page were created by a graduate online student. The project is located in San Francisco, but this student lives several hours away, works full-time, and has a family. These renderings were done in SketchUp.
Additional Learning Experiences

Academy of Art University has a hands-on program for every interest at every level. If you are looking to upgrade your career, explore something you have never tried before, or hone existing skills, we have a program for you.
PRE-COLLEGE ART EXPERIENCE (PCAE)
This dual-scholarship program allows current high school students to take art and design courses at no tuition charge. In addition, they earn scholarship dollars towards future undergraduate studies at Academy of Art University.
Visit https://www.dev.academyart.edu/academics/pre-college-art-experience-program or call 415.274.2200 for more information.

STUDY ABROAD
One of the best ways to learn about the world is to see the world. Take advantage of one or all of these exciting Study Abroad opportunities.

The Liberal Arts Seminar in Europe is a three-week intensive traveling course visiting some of Europe’s greatest cities and collections.

The Fine Art Intensive in Italy takes you to Florence, Italy, for seven and a half weeks during Summer semester.

The School of Fashion at awards scholarships to study in Paris with Studio Berçot and L’École de la Chambre Syndicale de la Couture Parisienne.

The Illustration Department also has a summer semester in Florence emphasizing cultural awareness in painting and drawing.

For more information about these Study Abroad opportunities, including cost and visa matters, visit www.academyart.edu/academics/study-abroad

CONTINUING EDUCATION
Time for a career upgrade? Want to follow your passion? Learn, be inspired, and expand your creative potential by taking hands-on courses from industry-experienced faculty. Flexible art and design courses are available online and in San Francisco.
Visit https://www.academyart.edu/academics/continuing-education or call 415.274.2200 for more information.
Academy of Art University is committed to the highest standards of achievement in art and design. Here’s a small sampling highlighting some recent accomplishments of our outstanding students, faculty, and alumni.
#3 BEST ONLINE ART PROGRAMS IN AMERICA

#1 ANIMATION & VISUAL EFFECTS SCHOOL IN NORTHERN CALIFORNIA

RANKED IN THE TOP TEN BEST PHOTOGRAPHY SCHOOLS

RED DOT RANKS SCHOOLS OF GRAPHIC DESIGN AND INDUSTRIAL DESIGN TOP 10 SCHOOLS FOR DESIGN 7 YEARS IN A ROW

8 YEARS WORKING WITH NASA

WHAT WE ARE LOOKING FOR
DEDICATION • PASSION • COMMITMENT • CREATIVITY
A substantial part of an artist’s growth and inspiration occurs outside the classroom or studio. At Academy of Art University, we understand this. Here are some resources and opportunities that are available to all students.
EVENTS
Campus Life is designed to inspire, educate, and promote fun. Our events are created in coordination with student-run groups and organizations. Make the most of your university experience: grow, learn, laugh, and run with us.

Visit https://www.academyart.edu/students/clubs-organizations/events for more info.

ACADEMIC CLUBS
Join students with similar interests to discuss ideas, promote your work, form collaborations, and share information.

FITNESS & RECREATION
Campus Recreation classes and workshops—and access to our free gym, pool, basketball courts, and skateboard ramp—will help you stay active healthy.

VIRTUAL BOOKSTORE
All required textbooks are available at our virtual bookstore.

CULTURAL CLUBS
Everyone needs a break from the studio. With dozens of clubs and organizations, find a new creative outlet and build lifelong relationships.

ESPORTS
Our active gaming community hosts and attends regular gaming events for both casual or competitive players.

URBAN KNIGHTS RADIO
Listen live online to our athletics teams, hear unique talk shows, and dance to your favorite tunes on UrbanKnightsRadio.com, an iHeartRadio partner.

HOUSING
Housing is guaranteed for all new, full-time onsite students. We have 17 different housing options to choose from located in the heart of San Francisco.

DINING
Stay healthy with delicious and filling meals in one of our dining halls with flexible meal plans and Knight Kash. Use the Knight Kash on your student ID for dining on campus and at select off-campus vendors.
San Francisco

One of the world's great creative capitals, San Francisco has been our home since 1929. Our neighbors include giants in everything from advertising, animation, and architecture to communications, game development, and web design.

Simply put, Academy of Art University is an absolutely amazing place to be a college student.

NCAA PROGRAM
Join one of our teams or come out and support your fellow artist-athlete. We play in great venues throughout San Francisco, including Kezar Pavilion, Paul Goode Field, SF Bay Tennis Club, and Presidio Golf Course, among others. Let the Fan Bus take you to the games.

The NCAA is a trademark owned by the National Collegiate Athletic Association.
ARTIST ATHLETES
The Urban Knights have quickly made a name for themselves with numerous conference and national accomplishments including 10+ NCAA championships. We are the first athletic program to win two NCAA National Championships (indoor and outdoor women’s track & field) in our first year of postseason eligibility. We have made over 40 postseason appearances in men’s and women’s cross country, women’s basketball, men’s indoor and outdoor track and field, men’s and women’s golf, and women’s tennis. Go Urban Knights!
Apply year-round, and begin taking classes in Fall, Spring, and Summer semesters. Our Admissions Representatives will help you every step of the way. They want to help you succeed, and are trained to make sure your application best reflects your abilities. Apply today!

Apply Today at academyart.edu

HOW TO APPLY
Apply online at academyart.edu
Or call 1.800.544.2787
Or apply in person in San Francisco
(Monday-Saturday)
79 New Montgomery St. San Francisco, CA 94105

YOUR COMPLETED APPLICATION MUST INCLUDE:
• $50* application fee ($150 international)
• $95* enrollment fee
• International applicants require a $300* international student service fee
• Fees can be paid by MasterCard, Visa, Discover.
  By mail: check or money order
*all fees are non-refundable, non-transferable

TRANSFER STUDENTS
1. Complete the application
2. Submit electronic transcripts to:
   transcripts@academyart.edu
   Or mail transcripts in a sealed envelope to:
       Academy of Art University
       Attn: Undergraduate Admissions Office
